

# Rust Preventives

## RUST PREVENTIVES

Brighton Labs premium rust preventives are formulated to provide excellent corrosion protection on a variety of metal substrates. Brighton Labs rust preventives and corrosion inhibitors are formulated to protect metal during the metalworking process, while in storage either indoors or outdoors, and during transportation. Protection can be formulated for short periods of time as well as for long periods of time.

We manufacture synthetic/water soluble, solvent based, straight oils, and oil/water soluble formulations to protect your metalworking products from the effects of rust and corrosion in all types of environments.

### Features and Benefits

- Low foam
- Uniform film coverage
- Long term rust protection available
- Low odor
- Residual film easily removable
- Non-staining and compatible with ferrous and non-ferrous metals
- Environmentally friendly
- Waste treatable
- On-site recyclable fluids

### Brighton Laboratories

- Serving the metalworking industry for over 25 years
- Experienced technical support to solve the most complex problems
- Custom formulated products manufactured for the toughest metalworking operations
- Designed to meet or exceed industry standards and specifications
- ISO 9001:2008 Certification

### Applications

#### Synthetic/Water Soluble

- Clean running
- Easy to maintain
- 30 to 90 days protection
- Dry to the touch

#### Solvent Based

- Water displacing and water separating options available
- Long term solution (90+ days)
- Dry to the touch
- Ocean/salt spray protection

#### Straight Oils

- Long term solution (6 months to a year)
- Wet based film

#### Oil/Water Soluble

- Low cost
- Long term protection
